### Optical Pickup Based upon Expertise as A/V Company

JVC's optical pickup is highly evaluated through development which conform to each application's characteristics, utilizing its expertise as A/V product manufacturer.

Our optical pickups provide x4 speed play by compact & lightweight actuator for home CD player, industry-leading heat-resistance for CAR CD player, and CD-R read function by twin lens pickup for DVD player, eventually realizing high quality, compact design and high cost-performance of these players.

### Optical Pickup for Car DVD

Slim Type Pickup for DVD with HOE Device

OPTIMA-2060

- High Resistance against Heat and ESD
- 8x Speed for DVD Playback / 24x Speed for CD Playback
- DVD Dual Layer  $\pm$ RW

■ Applications: Car DVD Players / Portable DVD Players

### Optical Pickup for car CD

High-performance, high-reliability pickups with the industry top level heat-resistance characteristics

OPTIMA-725

- Ultra-thin design (thickness of 11mm)
- Industry's top level heat-resistance characteristics
- For 4x speed
- High shock achieved with compact, high-sensitivity balanced actuator

■ Applications : Car CD player / Portable CD player

### Optical Pickup for car CD

Lightweight type with heat-resistance characteristics

OPTIMA-726

- Heat-resistance characteristics
- Lightweight design with plastic optbase
- High shock Proof achieved with compact, high-sensitivity balanced actuator
- For 8x speed (Max)

■ Applications : Car CD player / Portable CD player
